

# Ro-grille 800 series >

Rotec's range of Retractable **Security Grilles** provide a strong physical barrier for protection of windows and doors and are used on a diverse range of applications. The grille not only is an effective visual deterrent against attack, but also provides optimum ventilation and vision. All grilles are custom-made for individual openings, can be supplied with the optional facility for the bottom track to be removable, and also for the grille to be hinged aside where a clear width is of premier importance.

Kayes Jewellers, Chester

## Specifications:

- Made-to-measure to meet individual project requirements
- Discreetly stacks back to a fraction of the overall size
- Ease of access – a low-profile bottom track allows ease of access to wheelchairs and pushchairs
- Secure and easy to close multi-point slam-shut lock ensures outstanding protection and ease of use. A number of grilles can also be operated from a single key
- Anti-jemmy security strip protecting the lock from attack with a crowbar or other lever
- Strong durable finish in a wide choice of colours to blend in with any colour scheme
- Exceptionally low maintenance with a zinc plated anti-rust finish and no electrics to go wrong. Service and maintenance contracts are not necessary
- Traditional diamond-shaped lattice or attractive curved lattice
- Available as a single grille (locking to one side) or double grille (central lock-post)
- An insurance recognised grille is also available which has been independently tested by a third party achieving a Level 1 Security Rating which is a 'Secured by Design Police Preferred' specification.
